

SOUNDWAVE® LUNA
Acoustic Panel
By Teppo Asikainen

PRODUCT INFORMATION

Soundwave® Luna is designed by Teppo Asikainen. Luna is one of the first acoustic panels in the successful Soundwave® series. Its designed to absorb sound in the lower frequencies.

TECHNICAL INFORMATION

Soundwave® Luna is a heavyweight broadband absorber with extended efficiency in the low frequency range (150 Hz-500 Hz). This panel is very efficient in reducing the reverberation time (sound "bouncing around") in a room. This means that disturbing background noise will be reduced and voice intelligibility will be greatly improved. Recyclable moulded polyester fiber, with plastic back plate, in offwhite and grey.
